INTRODUCTION ASSIGNMENT

ASIA QUANT ACADEMY

INTRODUCTION TO FINANCIAL INDUSTRY

The following questions are open-ended questions. Yet, it will be invaluable for you to conduct your own research following this guideline as an assignment to have a better look into the industry.

1) Please find at least 3 companies for each of the following categories:

- a. Asset management
- b. Mutual funds
- c. Private equity
- d. Hedge fund – Long/Short
- e. Hedge fund – Macro
- f. Hedge fund – Relative Value
- g. Hedge fund – Quantitative
- h. Proprietary trading
- i. Market makers

2) For each type of the hedge funds above, please choose 2 and find the following information:

- a. Number of employees
- b. Rough distribution of job functions (e.g. Operation, technology, trading, quant, portfolio managers) [Hint: LinkedIn is your friend]
- c. Asset under management (AUM)
- d. High level description of their strategies, not necessary from their official websites or Wikipedia.

3) Please find quant developer, quant researcher and quant trader JDs from either investment banks or hedge funds, 5 for each job type. Then, extract and summarize the following information:

- a. Requirement on programming
- b. Requirement on mathematics
- c. Requirement on financial knowledge (e.g. type of financial products)

4) For each of the requirements found on question 3, please link these knowledge to the courses available in your university.

5) List out any questions/doubts when working on questions 1-4.
